# Dr. PRICE'S CREAM BAKING POWDER

It makes home baking easy and gives nicer, better and cleaner food than the "ready-made." There is no baking powder or preparation like it or equal to it for quickly and perfectly making the delicate hot biscuit, hot bread, muffin, cake and pastry.

No Alum—No Lime Phosphates

"Alum in baking powder is dangerous and should be prohibited."

### Lecturer on Live Stock.

The Missouri State Board of Agriculture has secured the services of J. K. Wright as farmers' institute lecturer on animal husbandry.

Mr. Wright was born and reared on a Missouri farm and graduated a few years ago from the college of agriculture at Columbia. He is a thorough student of agricultural conditions, an interesting speaker, and capable of judging either grain or live stock. As superintendent of schools in Boone county he organized the boys of the country schools into corn growers' clubs, and interested the girls in cooking and sewing competitions, an annual fair where the boys and girls entered their work being a feature.

For more than a year the Missouri board has been looking for an all round live stock man. After considering a number of men, including several from other states, Mr. Wright was chosen. With this additional man in the field, the board hopes to be able to meet most of the demands for farmers' institute work.

### Chautauqua Notes.

Chautauque patrons remember the Kirkcuth Sisters orchestra, the popular number appearing on the first day last year. This season we are to have another sextette of winsome girls, the Dunbar Singing Orchestra, for the first day's musical program.

Dr. William Edgar Gail, the explorer, who comes to speak at Chautauque, is said to be six feet four inches tall and otherwise formidable looking. Once a body of cannibals made a rush for him, but, noticing his great size gave it up as a bad job.

Hon. Arthur K. Peck, who gives illustrated lectures on life saving service, has himself served in the ranks and knows the hazardous enterprise from first to last.

Once when Thomas McClary, the funny man who is coming to speak at Chautauque, was sitting upon a platform during some preliminary features, a high school senior was heard to remark: "Well, if he is as funny as he is homely, I will die a laughing.".

### What About It.

I noticed a week or two ago that the Courier invited correspondence and I am of the opinion that there are a few matters which may thus publicly be discussed with a view to better conditions in our city.

Keytesville is legally a city and as such should put on the garb of a city and discard the village ideas. "When I was a child I spoke as a child but when I became a man, I put away childish things."

We should have a get-together club and pull shoulder to shoulder for a greater Keytesville, leaving no stone unturned which by its turning would add to the growth, beauty and prosperity of our city.

There is no very good reason why Keytesville should be without an electric lighting system. There are enough business houses and residences to make the proposition a paying one and this same plant could be used for operating an electric car between the city and the depot.

If Keytesville will, she can, and let's hope the business people will get together and if local capital cannot be raised, sufficient inducement be offered to outside concerns which are always on the watch for such opportunities of investment. Let us be a "city of Keytesville."

Ruben Dale.

### School for Institute Workers.

At the suggestion of T. C. Wilson, secretary of the Missouri State Board of Agriculture, a "school of instruction" for all the institute workers and lecturers under the board will be held at Columbia during the latter part of July or first of August. It is believed that this meeting, to be held at the College of Agriculture, will result in making the work of the board's representatives of still more practical value to the people.

### Turn on the Lights.

Bosworth is hot after electric lights and will no doubt soon accomplish its purpose. The only thing in the way is a site for the plant. If the town donates the site the deal will go through.

### Prince Errick

Is a fine sorrel trotting horse, 16 hands high and weighs 1200 lbs. He was sired by a thoroughbred Kentucky horse. He will make the season of 1910 at my farm 5 1/2 miles northeast of Brunswick, at \$10 to insure colt to test.

HOWARD is a fine three-year old Jack, 14 hands 3 inches high, registered in Cedar Rapids, Ia. He has good style and is a good breeder. He will make the season at the same place at the same terms.

Terms—A lien will be taken on mare until the colt is foaled, then lien on colt until season is paid in full. In all cases where mare is parted with or removed from the county before they foal the breeder will be held responsible for the season. Care taken to prevent accidents but not responsible should any occur.
